DETAILED ACTION

1. Claims 6-13 are pending.
2. Claims 1-5 have been canceled.
3. The Preliminary Amendments filed April 4, 2005 and May 21, 2008 have been considered.

4. At page 1, after the title, the continuing data should be updated.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 6-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. It is suggested that the claims should be amended to show that the process steps are related, i.e., Formula (I) is reacted to give Formula (II)...

B. It is suggested that the term "derivative" should be amended to read as a "compound".

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 1625

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claims 6-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagato et al. (Reference AO, cited by Applicants which is equivalent to Reference A, cited by the Examiner).

The instantly claimed process is disclosed. At columns 41-43, see Production Process 5. The difference between the prior art process and the instantly claimed process is formula (IV) versus formula (IX).

It would have been obvious to one of ordinary skill in the art to interchange a sulfonyl group for another in the pharmaceutical intermediate of Nagato et al. another radical such as oxygen in view of the known of equivalence and the expectation of similar pharmaceutical properties. Accordingly, the process is an obvious variant therefrom.

10. The Information Disclosure Statements filed April 4, 2005 and July 7, 2007 have been considered.
